## TECHNICAL SKILLS

### Languages

Proficient in Python, Html, CSS

Coding Experience in C, C++, Java, XML

### Tools

OS : Windows, Kali, Ubuntu

Software : Adobe After Effects, Photoshop, Burp Suite, Android Studio

Database : Mysql, MongoDB

## PROJECTS

### Surveillance Rover — *DLC Project*

Found out that I work even better under pressure - How to distribute work and manage a team efficiently

### adityanain96.github.io — *Personal Website*

Learned how to manage code changes using git- Got to know about the intricacies of Flex and Grid Layouts - Developed confidence that I can complete projects on my own from scratch

### GameinSane — Find gamers with similar interests

Built using JSP and MongoDB - Applied skills learned from creating Personal Website - Found out the advantages of MongoDB over Mysql

### College Companion — *AIO app for students*

Discovered Color Theory - Found out that learning while making a project is faster and fun way of developing new Skills - Helped me to get the Android Developer India Scholarship from Udacity

### News Blocks — *Blockchain based news portal (Business Plan)*

Proposed a business plan for News Blocks - Learned about blockchains and how cryptocurrencies work - Found out that blockchains can be used to fight the problem of fake news (my next project)
